Enlarged Prostate and ED; Today's Solutions will be the topic for South Lake Hospital's
June Health & Wellness Series

Clermont, Fla. – Enlarged Prostate and ED; Today's Solutions will be the topic for South Lake Hospital's June Health & Wellness Series on Wednesday, June 20, 2012 from 5:00 p.m. to 6:30 p.m. at the National Training Center. The program will be presented by Board Certified Urologist Kenneth Essig, MD.

June is Men's Health Month, so it's a perfect time to learn more about conditions that affect many men but can sometimes be difficult to talk about. Over 30 million American men have some form of erectile dysfunction (ED), which can significant impact quality of life for them and their partners. Enlarged prostate (BPH) affects more than 50% of men over the age of 60 and causes frequent urination with a weak flow. The good news is that nearly every man can be successfully treated for these conditions, and there is usually more than one option to choose from. In an effort to provide the best education on the latest medical advances, we will be hosting a community seminar to discuss the latest solutions for ED and BPH. We'll be discussing a wide range of treatment options ranging from medications to laser therapy to the latest in penile implants. Your spouse, partner or guest is welcome to attend. The seminar is free, and refreshments will be served. Presented by Board Certified Urologist Kenneth Essig, MD. Space is limited, please call 877.433.2873 and reserve your spot today.

The National Training Center, part of South Lake Hospital, is located at 1935 Don Wickham Drive, in Clermont on the hospital campus.

South Lake Hospital is a not-for-profit acute care community hospital, in partnership with Orlando Health. South Lake Hospital has been providing quality healthcare services to the South Lake County for over 60 years. For additional information about South Lake Hospital visit www.southlakehospital.com.
