Myofascial Pain Syndrome will be the topic for
South Lake Hospital's June Health & Wellness Series

Clermont, Fla. –Myofascial Pain Syndrome will be the topic for South Lake Hospital's June Health & Wellness Series on Monday, June 7, from 6:00 p.m. to 7:00 p.m. at the National Training Center. The program will be presented by Margarita Correa, M.D., board certified Physical Medicine & Rehabilitation.

Myofascial pain syndrome (MPS) accounts for a vast majority of soft-tissue pain conditions. MPS is a condition characterized by chronic and, in some cases, severe pain. It is associated with and caused by "trigger points" (TrPs), which are localized and sometimes extremely painful contractures ("knots") found in any skeletal muscle of the body. Come learn about MPS and treatment options.

The event is open to the public at no cost. For more information and to register, please call 352.394.4071, extension 4412. The National Training Center, part of South Lake Hospital, is located at 1935 Don Wickham Drive, in Clermont on the hospital campus.

South Lake Hospital is a not-for-profit acute care community hospital, in partnership with Orlando Health. South Lake Hospital has been providing quality healthcare services to the South Lake County for over 60 years. For additional information about South Lake Hospital visit www.southlakehospital.com.
